

# LOVE CONSTRUCTION

*"I love construction because I like being active and working outside in a friendly working environment."*

Adam Newman

# LOVE CONSTRUCTION

## Edexcel Level 1 BTEC Diploma in Construction

### 1 year full-time

Based at our Masons Road workshops, this course is designed for someone thinking about a career in the construction industry. It covers a variety of basic skills for a range of trades associated with the industry.

### Assessment:

The emphasis for assessment is on a series of practical assignments. This is combined with written tests.

### To Join the Course:

You will need good hand-eye co-ordination and a reasonable level of Mathematics and English.

### Further Opportunities:

A Level 2 course in a specific construction trade. Possibly an apprenticeship.

## CAA Level 2 Diploma - Wood Occupations - Site Carpentry CAA Level 2 Diploma - Trowel Occupations - Bricklaying

### 2 years full-time

Based at our Masons Road workshops, this course is for students looking for a career in either bricklaying or site carpentry. It is the Technical Certificate of an apprenticeship in these trades. Students gaining employment while studying on the course can transfer to the apprenticeship programme.

Both Level 2 courses constitute the Technical Certificate element of an apprenticeship in Construction.

### Assessment:

Assessment for this course is by a series of practical assignments combined with online exams.

### To Join the Course:

- Good hand-eye co-ordination is essential for this course, with a commitment to succeed in the building environment
- Good levels of Mathematics and English are also required. A foundation in Level 1 Construction course such as the BCO is a distinct advantage

### Further Opportunities:

As this course forms an essential part of an apprenticeship in Construction, the natural progression is to join an apprenticeship programme.
